DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Norway on 12/06/02. It is noted, however, that applicant has not filed a certified copy of the 20025858 application as required by 35 U.S.C. 119(b).

Claim Objections

2. Claim 1 is objected to because of the following informalities: on lines 5-6, "the two part of the wire" lacks proper antecedent basis. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by GB 2156401. GB '401 shows a device in a riser-tensioning device or a vessel in which a wire (16) is connected to riser (1) and extends from the riser up to and over pulley wheels (14, figure 2) and further on to a wire-tensioning device (abstract, 21) with two parts of the wire extend in opposite, substantially horizontal direction out from the pulley wheels (figure 2).

As concerns claim 2, GB '401 shows the wire to extend movably through the wire-tensioning device (figure 2).

As concerns claim 3, GB '401 shows the pulley wheels (14) are connected to a pulley wheel guide (12), which is movable relative to the vessel (indicated by arrows in figure 2, 17).

As concerns claim 4, GB '401 shows one of the end portions (34) of the wire (3Q) are connected to the pulley wheel guide (figure 2, 12).
